

### REMARKS

Entry and consideration of the above amendments prior to a first Official Action on the merits are respectfully requested.

Claims 2-23 are pending in the Application. Applicants have canceled claim 1 and added new claims 2-23 herein.

#### Specification

Applicants have amended the specification to expressly include a portion of the subject matter disclosed in the U.S. Patent 4,778,275 which was incorporated in the parent Application 10/079,826 by reference. Specifically, Applicants have incorporated the subject matter starting at col. 7, line 63 through col. 8, line 63 of U.S. Patent No. 4,778,275. Applicants also incorporated the subject matter in col. 12, line 40 through line 44 and the subject matter starting at col. 8, line 64 through col. 10, line 16 of U.S. patent No. 4,778,275.

Because U.S. patent No. 4,778,275 was incorporated by reference in the parent Application, the portion of U.S. Patent No. 4,778,275 that is added to the specification in this amendment does not constitute a new matter. Therefore, no new matter has been introduced.

#### Abstract

Applicants have deleted the abstract of the parent application and replaced it with a new abstract which pertains more to the currently claimed invention.

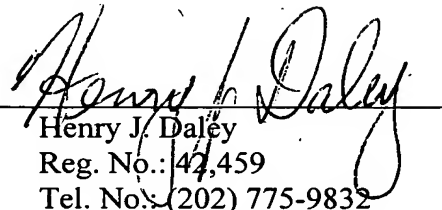

#### Drawings

Applicants have added FIG. 1A. FIG. 1A corresponds to Figure 3 of U.S. Patent No. 4,778,275 which was incorporated by reference in the parent Application 10/079,826. Applicants merely deleted some of the reference numerals which appear in Figure 3 of U.S. patent 4,778,275 as these reference numerals are not referred to in the portion of specification which is incorporated in the current specification. No new matter has been introduced.

An early and favorable first Action on the merits is respectfully requested.

Respectfully submitted,  
Pillsbury Winthrop LLP
